

Clever Safety Decision

## Most major EU industries are already using GlobalMark®. Find out the benefits it offers:

Need	Feature	Advantage & Benefit
Quick	GlobalMark® from Brady, you can simply create and control your on-site signage at any workplace, anywhere, and at any time.	Immediate response.
Clever Operation	The big multicolour Windows CE touchscreen makes it simple to use.	No training required.
Efficiency	700 built in symbols & formats (safety signs, warnings, instructions and information, pipemarking, etc.). GlobalMark® increases the visual impact of your safety identification.	Custom signage is more eye-catching and makes your workplace safer.
Compliance	GlobalMark® automatically creates multicolour signage while respecting norms and directives regarding colours.	GlobalMark® ensures that your safety signage will be in perfect conformity with current legislation.
Cost Saving	Ordering labels from external suppliers takes valuable time and money. Any customisation makes it even worse. And while the sign is not in place, accident probability increases. GlobalMark® saves time and offers you the freedom to customise your own signage.	GlobalMark® saves you time and money.
Reliability	Using GlobalMark® and Brady materials leads to durable, reliable and high quality signage.	With GlobalMark® you get a perfect result guaranteed at all times.
Professionalism	Touchscreen technology, ease of use, versatility and speed, there is almost no limit to what you can produce. Industry, manufacturing, services, transport, events...show your professionalism.	GlobalMark® does it all. No need to buy different products.
Adaptability	GlobalMark® is designed to work as either stand-alone or PC connected; the highest quality of outcome is the same. In addition, PC-use opens the door to enhanced features such as graphics import (company logo), database connection, and multiple bar codes.	Computer literate or not, you can still use GlobalMark®. No need to have a PC!
Ready made	To ease the comfort of your work even more, you can print the most frequently used signs from the ready-made database by using the quick label function.	GlobalMark® + FlashSign: choose and print. As simple as that! Everybody can do it.
Flexibility	Print 13 mm – 100 mm in width, for labels as long as 3m. 300 dpi printing. Print vinyl, polyester, magnetic and phosphorescent labels.	GlobalMark® adapts to your specific needs and environment with no extra cost.

Next Generation of Do-it-yourself Signmaking System from Brady brings innovative spirit to every day performance. Fast processing, sharp signage, easy to maintain, user-friendly operation are features that help get tasks done effectively.

## Highlights for Easy Use

- Touch screen technology
- Windows CE operating system\*
- Use with or without computer
- Own keyboard, mouse, PC-connectivity (serial/USB)
- Integrated cutting system (Color & Cut model) allows the die-cutting of the chosen sign or graphic to the desired shape for greater impact and visibility
- Multiple colour printing (spot colour) ensures the production of signs that are in full accordance with legal requirements.
- Full colour (process colour) technology provides a convenient way to print even more sophisticated graphics (e.g. company logos).

\*Windows CE is a trademark of Microsoft Corp. USA.

## Printing functions

- Multiple lines of text
- Rapid text function
- Reverse printing

## Complementary products

**MarkWare™** – MarkWare™ Industrial labelling software is the indispensable complementary tool to mark your entire building or Facility. Extremely easy to use, it will allow you to import images & logos, connect to database, barcodes... a further step towards increased efficiency.

**Quick Label Application** – “FlashSign” is a specialty application for printing pre-made labels. It contains 100s of the best selling local Safety Signs and Symbols available through current sign suppliers. Just select the one you want and it prints directly on your GlobalMark®. It's as simple as that! (For more info visit: [www.bradyeurope.com/quicklabel](http://www.bradyeurope.com/quicklabel))

**Laminator** – BLS 2000™ is a dedicated laminating system, offering rigidity and protection. The outcome makes the finished product look even more professional, allowing the panel to be mounted on, or suspended from, the material of your choice.

**Rigid Framing System** – a simple wall mounted framing system to make the range of safety signs more attractive in less industrial environments such as offices and reception areas. It provides modern and decent design, completing the usage of the Do-it-yourself sign making systems in every company.
